
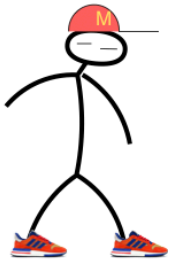
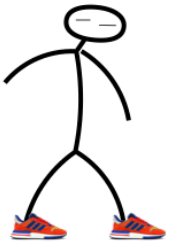
This is Walter.
Walter is a busy man. He has too much to do between classes, work and friends. Its even hard for him to find time to eat and even harder for him to clean his room!



Walter only gets free time late at night, at which time his favorite grocery store closes. His only option is to go in-between classes.

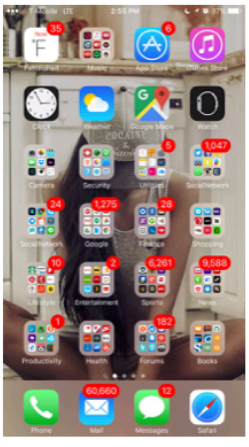


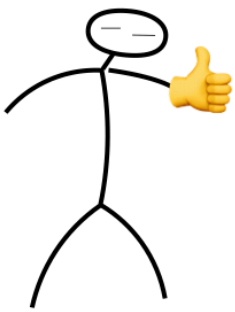
Sadly, his favorite groceries store doesn't have everything. It's only Walter's favorite since it's close and decent.

Walter tried to find another store online but most of the products either don't show up online, or are on the website but not in store. Walter can't trust online websites, they are unreliable

---

One day, Walter's friends talk to him about this groceries application. That would allow him to get to new store and find everything Walter needs!!





With this application, Walter won't have to go blindly into a random store anymore. He can just know where every item is, and thus, come in and out with enough time to go in between classes.

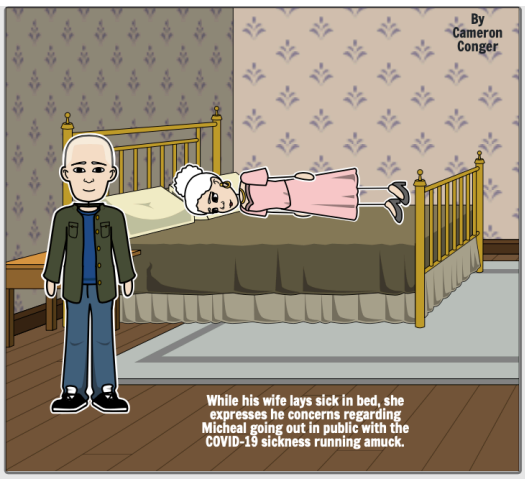
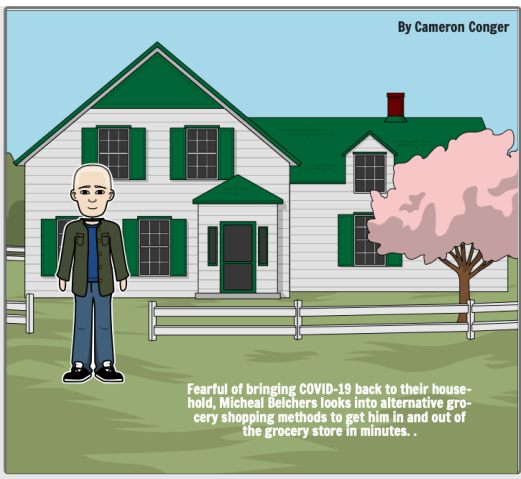
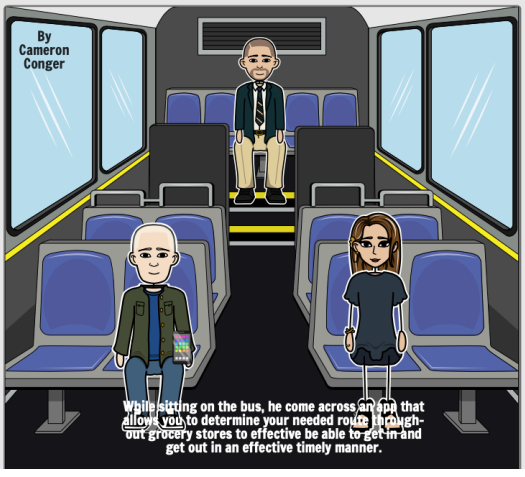
Micheal Belcher has been completely slammed with working at his accounting firm, he hasn't gotten the chance to get groceries for the week.



By Cameron Conger
While his wife lays sick in bed, she expresses he concerns regarding Micheal going out in public with the COVID-19 sickness running amuck.

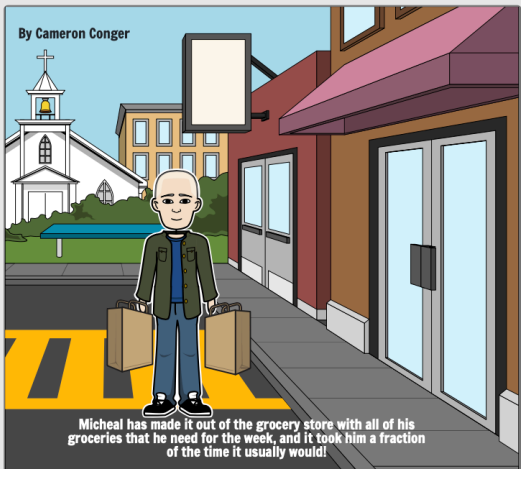


By Cameron Conger
Fearful of bringing COVID-19 back to their household, Micheal Belchers looks into alternative grocery shopping methods to get him in and out of the grocery store in minutes. .

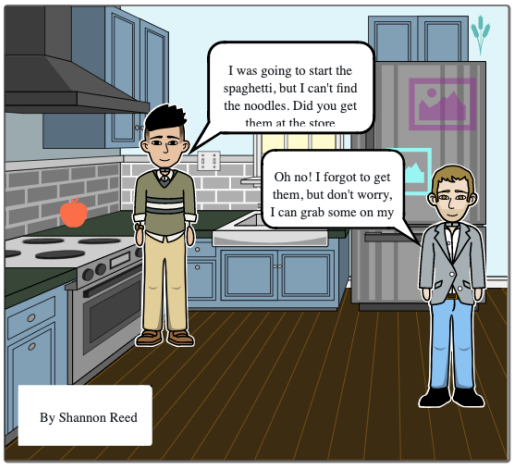


By Cameron Conger
While sitting on the bus, he come across an app that allows you to determine your needed route through-out grocery stores to effective be able to get in and get out in an effective timely manner.

By Cameron Conger
Since Micheal has been having difficulty walking around the store with his newly replaced hip, so the clerk offered him a wheelchair which allows him to effectively follow the route provided by the app.



By Cameron Conger
Micheal has made it out of the grocery store with all of his groceries that he need for the week, and it took him a fraction of the time it usually would!



I was going to start the spaghetti, but I can't find the noodles. Did you get them at the store
Oh no! I forgot to get them, but don't worry, I can grab some on my

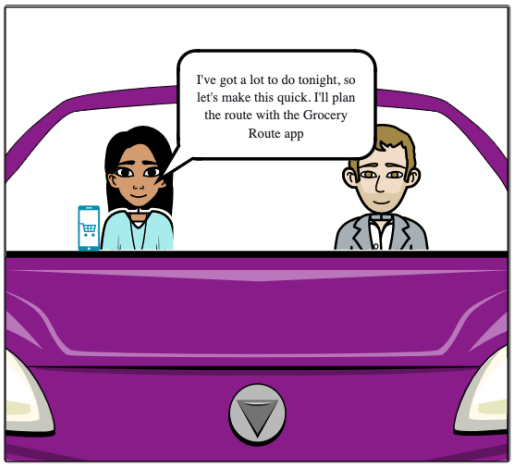
I still have to pick up Sam from her friend's still... I hope she won't mind going to the store, I know she has homework left to do tonight

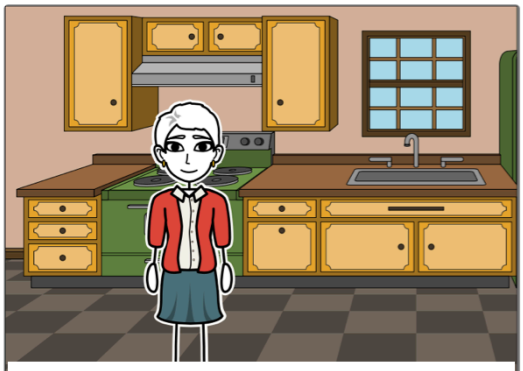
Later!



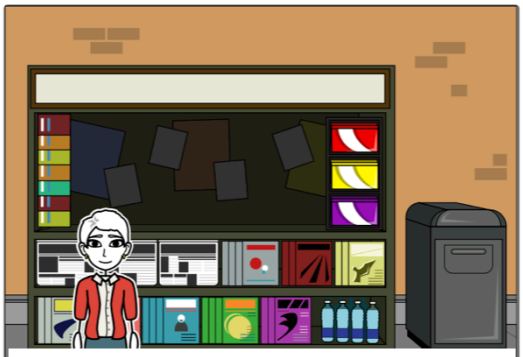
I've got a lot to do tonight, so let's make this quick. I'll plan the route with the Grocery Route app

Wow! That app made this so much faster than just looking
Yeah, you should really use it more

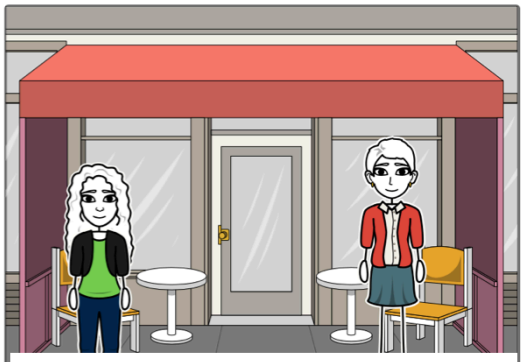
Dinner's ready!



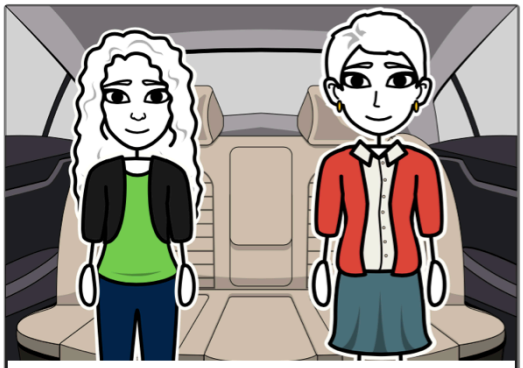
Samantha is 19 years old and new to town!



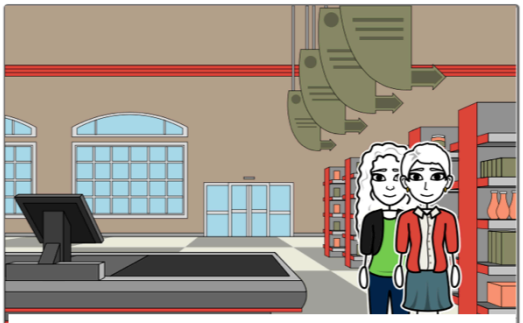
Unfortunately, she doesn't know the stores around and struggles to find all she needs straight away.



As she walks around town Samantha meets Rebecca, her classmate in Computing in the Modern World! (Best class out there!!!)



Rebecca can't let her classmate struggle, so she drives her to a good grocery store around.



To make sure Samantha stays with no issue finding products later on, she shows her an application that optimize her shopping list and shows store nearby

With this help from Rebecca, Samantha was able to fully focus on her upcoming semester and shop well at the same time
